

## Environmental Policy

Moving Earthworx believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to

- Abide and comply with all applicable legal requirements
- Cultivate and uphold an environmental management system that is amalgamated into Moving Earthworx requirements.
- Create a mindset that works towards achieving sustainable development when formulating business decisions.
- Endeavour to preserve resources, reduce waste and minimize the environmental impacts related with Moving Earthworx's products, services and processes.
- Minimise energy and water usage in our buildings, vehicles, and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Operate and maintain company vehicles (where appropriate) with due regard to environmental issues as far as reasonably practical and encourage the use of alternative means of transport and car sharing as appropriate.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.
- Apply the principles of continuous improvement in respect of air, water, noise and light pollution from our premises and reduce any impacts from our operations on the environment and local community.
- All employees and stakeholders to be made aware of Moving Earthworx's environmental objectives and expectations
- Education and awareness that all employees, sub-contractors, suppliers and consultants are aware and have the necessary skills to fulfill their environmental obligations with regards to Moving Earthworx's day to day work practices.
- Work together collectively with our current and future clients and stakeholders to assist them in reaching their environmental objectives and obligations.
- Continual review of environmental management aspects to ensure its relevance and effectiveness to Moving Earthworx practical operations.
